Study Guide

2024

Applied Research
APRE402

Module Coordinator : Prof Richard Millham
Office : West Wing, Block B
Campus location : Ritson
Telephone : 031 373 5542
E-Mail : richardm1@dut.ac.za
Consultation times with Lecturer: email to book a consultation time

Head of Department : Dr Tlou Masenya
Programme coordinator : Prof Richard C Millham
Campus location : Ritson
Contact : richardm1@dut.ac.za
Departmental Secretary : Ms Nthuli Thabile
Contact : 031 373 5596/ @dut.ac.za

Consultation : Compulsory weekly consultation with the supervisor

Consultation Mode : Office Physical Meetings

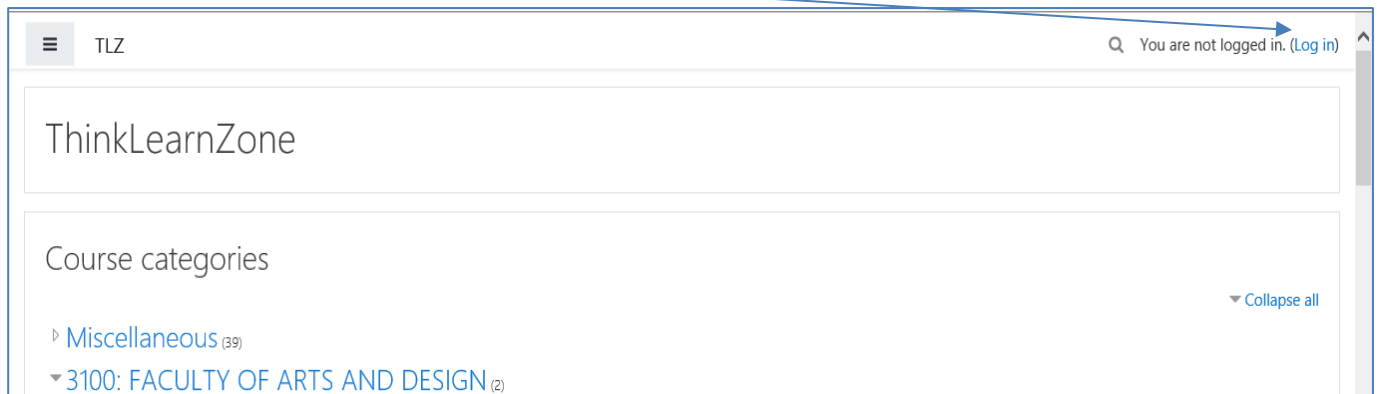

1. Welcome

This study guide provides important information regarding the requirements, administration and expectations for this module.

1. Using your online ThinkLearnZone (Moodle) classroom

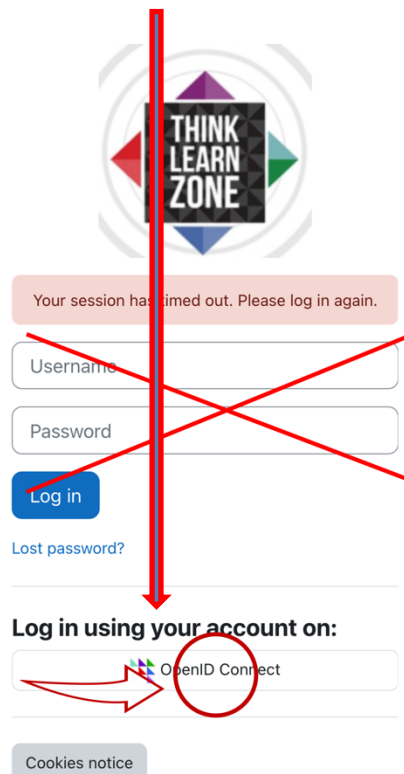

All taught subjects/modules have their own online classroom on the ThinkLearnZone. You can access your classroom at <https://tlzprod.dut.ac.za>

Click on (Log in) on the top right corner

On the next screen click on

“OpenID Connect”

Use your dut4life email address to sign (yourstudentnumber@dut4life.ac.za) and your email password as your password (Dut + first six digits of your ID no., e.g. Dut980610. For first-time 2020 students - use \$\$Dut + first six digits of your ID no., e.g. \$\$Dut980610)

Ask your lecturer for guidance or check out “how to log in” from here:

<https://www.dut.ac.za/faq-students/>

The e-learning website also has contact information for help and technical assistance

<https://www.dut.ac.za/elearning-contacts/>

You can call the e-learning helpdesk on 031 373 67810 or email them on tlzsupport@dut.ac.za

2. Introduction to the module

Applied Research aims to advance interpretive skills, methodical application of techniques and adherence to principles and philosophies within the discipline of IT research. This module is designed to facilitate the student as they develop skills for the conduct of high-quality research undertakings.

Module content is continuously updated to align with contemporary knowledge and developments in IT research.

As the module progresses, students will be required to demonstrate skills in formulation of research questions, aim and objectives, the conduct of critical review of literature, and application of IT-related data collection and analysis techniques.

3. Learning outcomes

Upon completion of this module, the student will be equipped with knowledge of research concepts and practised its application to contribute knowledge towards an IT discourse. This module facilitates its learners in exploring recent and emerging methodologies, practices and paradigms in IT research. See Appendix A for learning outcomes and assessment criteria.

4. Learning, teaching and assessment strategies

a) Learning activities

Learning activities may include contact lectures and self-learning. The assessment requires the professional presentation of a developed research artefact. Submission of assessments and tutorials via online tools. Seminars, presentations and workshops from the staff at DUT Library on research tools and databases.

b) Graduate attributes

This course strives to develop the following graduate attributes:

- Active and reflective learners through engagement with recent and relevant developments in IT research
- Critical and creative thinkers who work independently and collaboratively in various forms of research undertakings
- Effective communicators of research undertakings and findings
- Practised research and scientific writing skills

c) Assessment

The following sections highlight the assessment strategies.

Final mark

This module is a 100% course mark. The student must obtain a minimum of 50% to pass this module.

The module final mark will be calculated as follows:

Course mark	%
Abstract	5
Introduction	15
Literature Review	25
Methodology	20
Results and Analysis	25
Discussion and Conclusion	5
References and Presentations	5
Total	100

d) Activities to promote learning

Although attendance of lectures, when scheduled, and that of workshops is vital for developing a core understanding of Research Skills concepts and assessment requirements, the focus of this class is the development of a research artefact, with the mentorship of your supervisor.

Students are required to access the online learning platform. Important information and course material will be disseminated through this medium.

Students may engage in online discussions relating to course content, assignments, test preparation and tutorials where applicable. It is quite common for students to form social media chat groups. This is a powerful medium for peer-to- peer collaboration and assistance.

e) Use of library

Textbooks, online journals and other relevant publications are available via the library. Tools such as Endnote and Turnitin are also available.

5. Schedule of work

Deliverables	Section	Date
	Introduction	23 August 2024
	Literature Review	13 September 2024
	Methodology	27 September 2024
	Presentation of Results and Discussion	18 October 2024
	Summary, Conclusions and Implications of Study	01 November 2024
Review	Plagiarism Check, Language Editing	02 November 2024
Final Submission	3 November 2024 at 10am via Moodle wall	
Lecture Series		
July	Research Software Support (Endnote etc.) Ethics	
August	Systematic Literature Review Literature Review	
Student Engagement		
October	Progress Report	

Submissions, other than the final submission, must be sent via email to your respective supervisor

6. Copyright and plagiarism

Plagiarism is the use of any sources of information including but limited to books, journal articles, extracts from the thesis, online documentation, website material or any other material written by someone else and presented as the student's own. Plagiarism includes the 'copying and pasting of information from any source which is then presented as the student's own. Plagiarism also includes copying other students' assignments, group assignments, projects and any assessments and presenting this as the student's own.

A single instance of plagiarised work will result in a zero mark without the option of resubmission

In escalated circumstances, plagiarism may lead to an institutional disciplinary hearing and a fine imposed on the student.

A plagiarism declaration will be made. This declaration must be completed and signed by each student and attached to every assignment handed in for assessment. Assignments will not be marked if this completed plagiarism declaration is not attached.

Furthermore,

- At least 20 references to be used
- No bibliography or in-text references in artefact: 0% awarded (as per Faculty plagiarism policy)
- Plagiarism in artefact above 15%: 0% awarded

7. Student support

Students are advised to set appointments for lecturer consultations. Difficulties experienced with any aspect of the syllabus or the module, in general, may be addressed during consultation times.

Students that are performing poorly will be called in for special meetings with the lecturer to derive means of improving their performance in the module and discussing any experienced difficulties.

8. Work Integrated Learning (WIL), industry, community, and occupation-related information.

There is no WIL component for this module.

9. Quality assurance and enhancement

Students will be allowed to provide feedback on the quality of the module and their learning experience through the APRE 401 supervisors and module evaluations when requested by the CPQA. Students are invited to extend comments, criticisms, or constructive contributions about module delivery and content to the lecturer. In addition, there will be student representative meetings once per term.

10. Useful resources

There are no prescribed texts for this module. The following list of references is useful:

1. Leedy, P.D. and Ormrod, J.E., 2021. Practical research: Planning and design, global edition. England: Pearson Education Limited.
2. Creswell, J. W. 2018. Research design: qualitative, quantitative, and mixed methods approaches Fifth edition. Sage.
3. Dane, F.C. 2018. Evaluating research: methodology for people who need to read research Second edition. Sage.
4. Myers, G. Research methodology: the beginner's manual. 2017. Acacia Private Publishing.
5. Kumar, R. 2019. Research methodology: a step-by-step guide for beginners Fifth edition. Sage.
6. Locharoenrat, K. 2017. Research methodologies for beginners. Pan Stanford Publishing.

Other relevant publications will be pointed out by the lecturer. The student is responsible for locating and downloading a copy. These may form part of the examinable material.

11. Research Paper (Final Artefact) Instruction

- Use standard Time New Roman, font size 10.
- Use 1.5cm Spacing
- Include page numbers.
- Please note that you will be evaluated on your writing skills
- All work must be typed and be in MS-Word format for easier marking and commentary

Appendix A

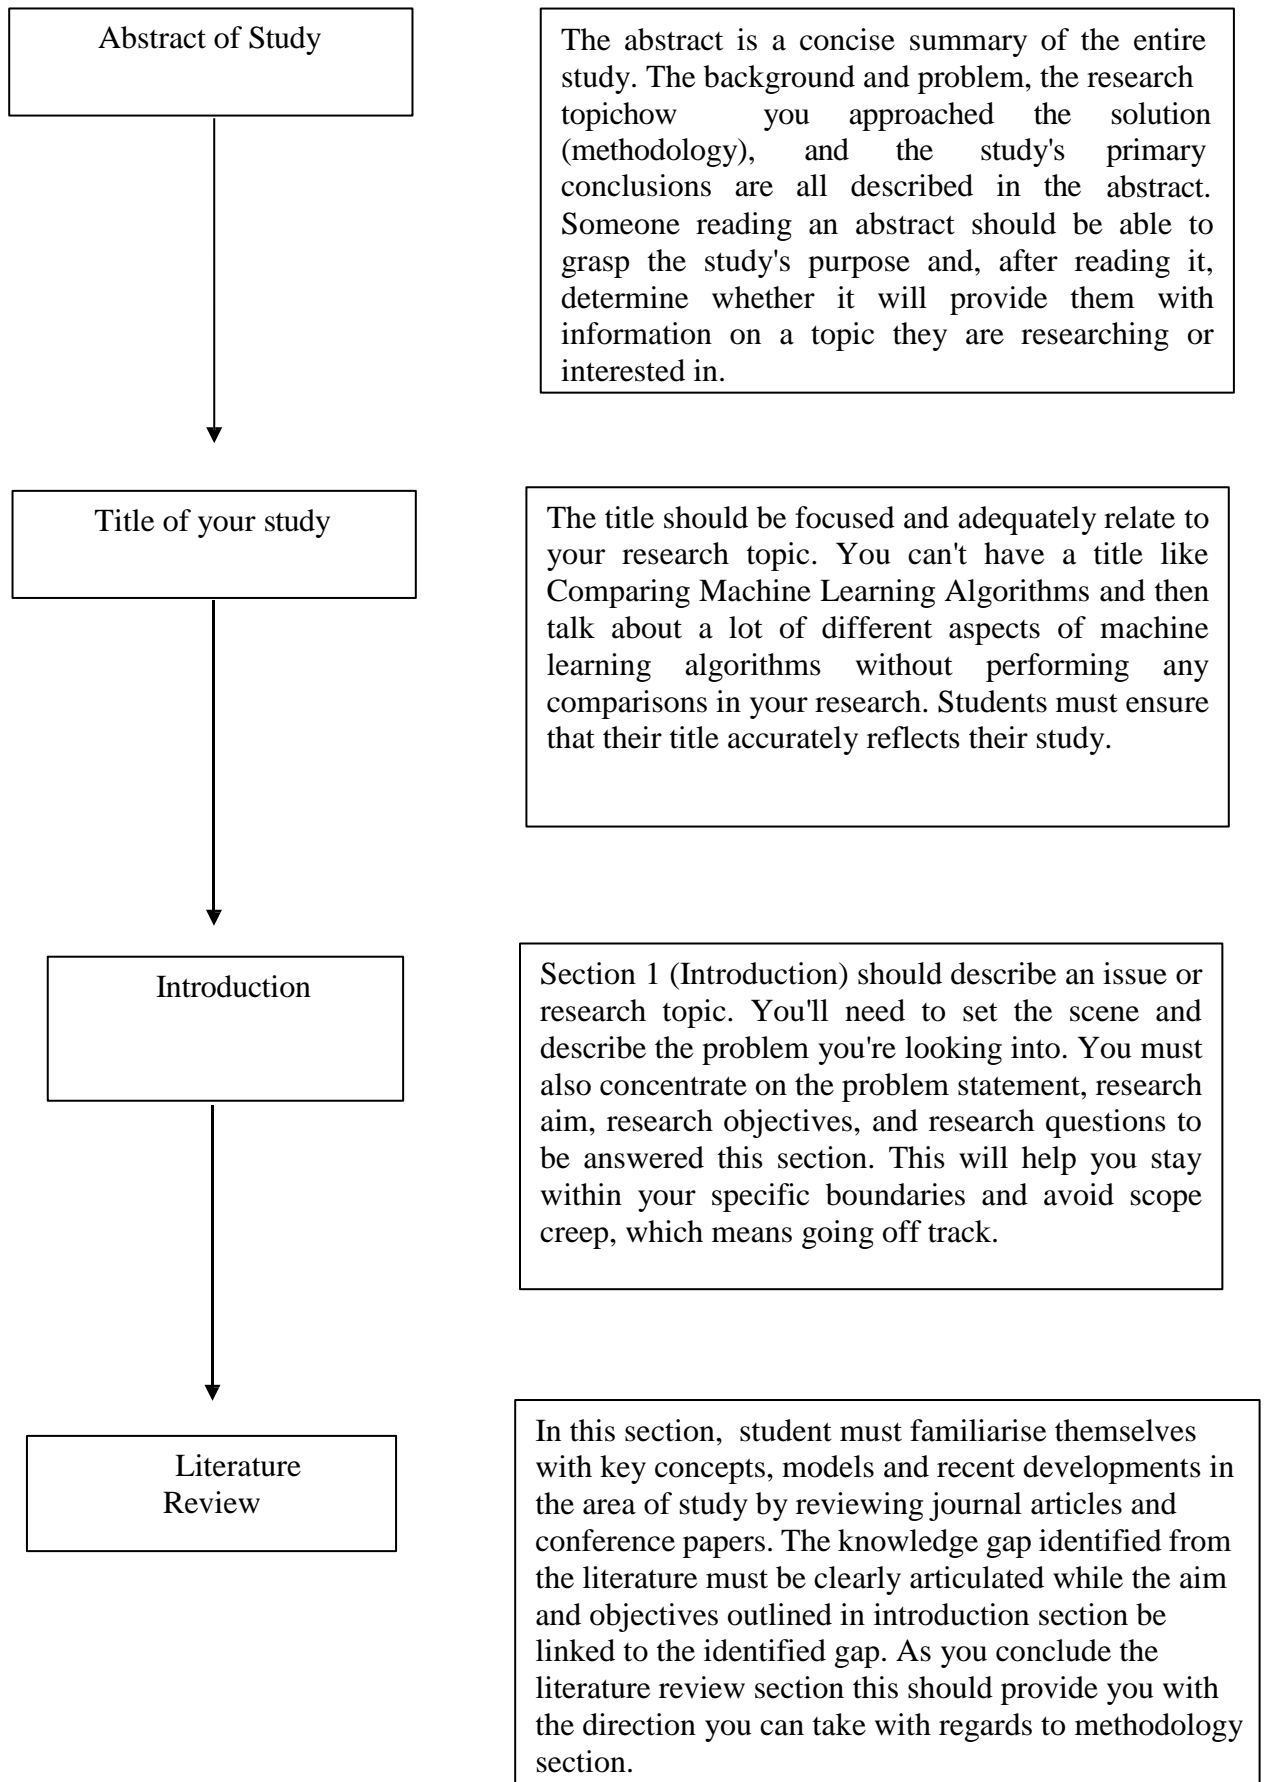

Learning outcomes

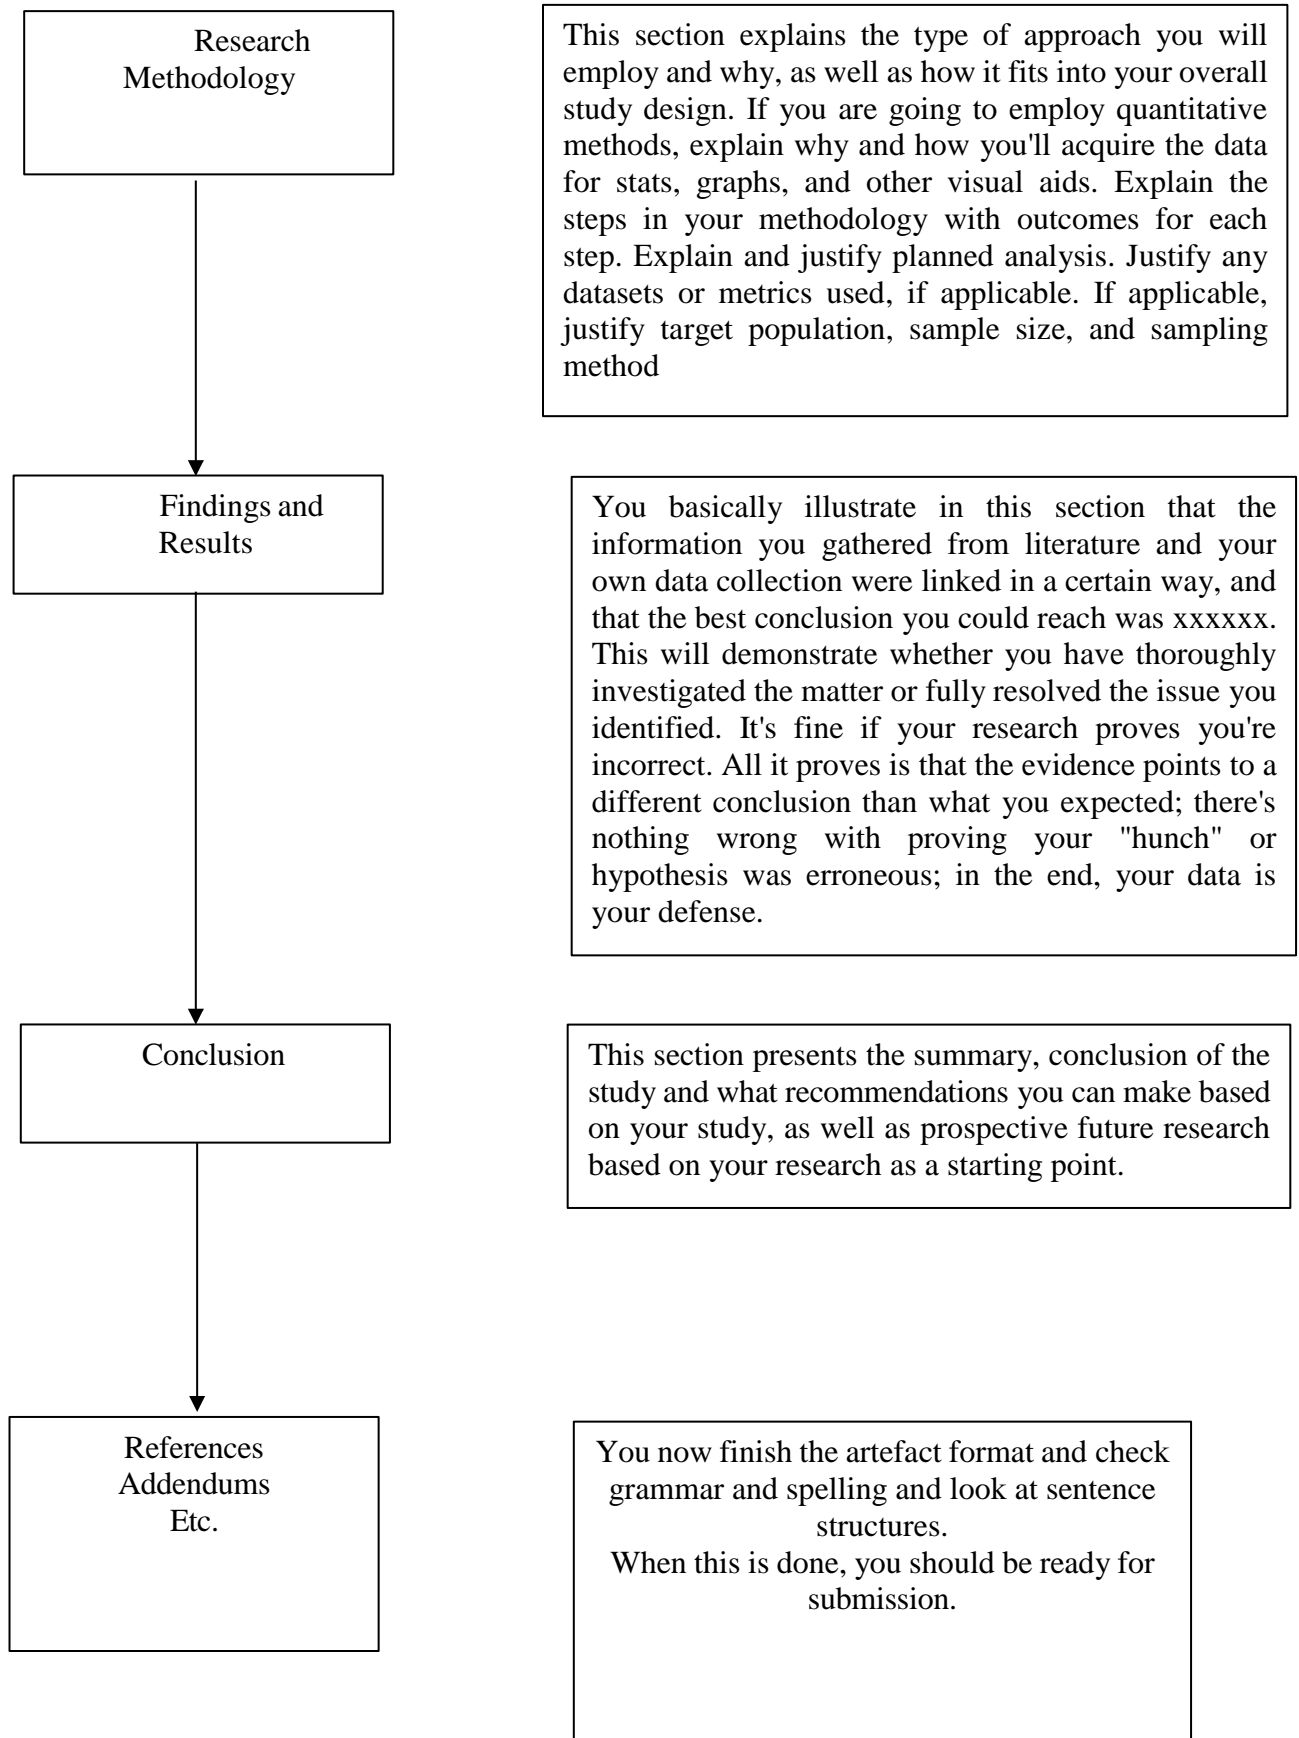

1. Analyse contemporary literature and establish a focused topic for investigation
2. Synthesize and report recent and relevant information in a cogent and coherent manner
3. Apply quantitative or qualitative research methods
4. Apply data collection and analysis techniques
5. Apply research ethics

2024

DECLARATION

I, *Name of Student*, declare that:

- (i) The research reported in this research paper, except where otherwise indicated, is my original research.
- (ii) This research paper has not been submitted for any degree or examination at any other university.
- (iii) This research paper does not contain other persons' data, pictures, graphs or other information unless specifically acknowledged as being sourced from other persons.
- (iv) This research paper does not contain other persons' writing unless specifically acknowledged as being sourced from other researchers. Where other written sources have been quoted, then:
 - Their words have been re-written but the general information attributed to them has been referenced.
 - Where their exact words have been used, their writing has been placed inside quotation marks and referenced.
- (v) This research paper does not contain text, graphics or tables copied and pasted from the Internet, unless specifically acknowledged, and the source is detailed in the research paper and the Reference Section of this research paper.

Signature: *Name of Student*

Date

Section Sizes

- **Abstract: ½ page**
- **Introduction: 2 pages**
- **Literature Review: 7.5 pages**
- **Methodology: 4 pages**
- **Results: 5 pages**
- **Conclusion: 2 pages**
- **/20 pages excluding references, title page, and plagiarism declaration**

Outline of Paper (Explicit/Implicit Parts)

First headings should be explicit but inner headings may be implicit

- **Abstract:**
- **Introduction**
- **Problem**
- **Objective(s)**
- **Methodology**
- **Analysis**
- **Result**
- **Introduction:**
- **Background**
- **Problem Statement**
- **Aim & Objectives**
- **Contribution**
- **Outline of Paper**
- **Literature Review:**
- **Structure (Flow and Argument)**
- **Good coverage of relevant literature**
- **Critical Analysis**

- **Methodology:**
 - **Research Design**
 - **Research Steps with Outcome**
 - **Data Collection (Dataset/Questionnaire)**
- **Results:**
 - **Presentation**
 - **Results and Interpretation**
 - **Evaluation of Method**
- **Discussion and Conclusion:**
 - **Summary**
 - **Achievement of Objectives**
 - **Limitations/Implications**
 - **Future Work**
